**Equipe SEEDS**

**Appel à candidature**

**Sujets de thèse**

**Sujet 1** : Digital transformation and Risk management

**Sujet 2** : Projects Portfolio and Risk management

**Sujet 3** : Digital transformation & Agility

**Sujet 4** : Management IT & Lean Management

**Sujet 5** : Modélisation, prédiction et contrôle pour les Energy Management Systems (EMS) dans les Smart Grids

**Sujet 6** : Exploring microservices architectures to detect and resolve anomalies and anti-patterns

**Sujet 7** : New approaches for detecting software smells

**Sujet 8** : Process mining for better decision support systems

**Sujet 9** : Towards an open-source platform for the integration of smart grid services

**Sujet 10** : Optimization of ECUs for connected vehicles

**Sujet 11** : Formal verification and validation of real-time embedded systems

**Sujet 12** : Security of OS kernels for better/optimized virtualization solutions
